**Michigan Election Fraud Update: How the Election was Stolen**

The Professor's Record with David K. Clements April 7, 2022

<https://rumble.com/v102cgi-michigan-election-fraud-update-how-the-election-was-stolen.html> (6m:30s)

**ELECTION NIGHT REPORTING:**

Michigan vote ratio as compared to a standard example plot for an industrial controller moving a process to new setpoints. (46m:29s)

Plot the average of dice roll 1000 times: (49m:47s)

[https://en.wikipedia.org/wiki/Law\\_of\\_large\\_numbers](https://en.wikipedia.org/wiki/Law_of_large_numbers)

**Draza Smith (DS) (52m:24s) (Mathematician), speaking of Montmorency County, MI:** "...this this county right here, very small county in Michigan, which is one of the counties that these wonderful people got me the **cast vote record** for in the **cast vote record** is a report that's produced by the machine. There's no Secretary of State in the middle, there's no Edison. There's no news media. **This is what's coming out of the machine that counted the people's votes in this county. So I really love these cast vote records. ... But this is what we would expect.** Because you'd see it you see the votes coming here where we get a little bit of movement here in this part, and **then it flattens out to this average opinion of the people.**"

**Draza Smith: (54m:44s)** "...here is **Dickinson County**. So now that we've talked about you know, that this that **we get to this law of large numbers and everything stabilizes and we need to have reasons why the boats are moving. We have this very strange angle these strange angles here, where our ratio moves linearly, and then linearly and linearly.**"

**Draza Smith:** (58m:26s) Regarding the Alpena County Voting graph: "...**They were going like 5.5 to one Trump to Biden votes so they had to push some Biden votes forward to make that first dip. And then they had to push some Biden slips forward to make the second dip and push them vote. votes. For it again.**"

**I love the fact that when they do these slides when they do these declines the even though I'm copying and restructuring of the database, this is done to look random. Computers are really bad about doing random and having it really be random. So we end up with these beautiful parabolic slides in the overall vote ratio."**

\*\*\*\*\*

"I'm just Alex" blogger interviewed a **Dr. Smith Engineer from Texas** (no relation to Draza Smith) who is **explaining in more detail what Draza Smith and other experts believe about the fraud coming from the Voting Machines.** You can

watch the entire helpful explanations 1 hour 14 minute video here: <https://www.bitchute.com/video/rbA7FtN7nBz7/>

**What follows are two helpful charts explaining the election machines' fraud:**

(See this **"Rigged Election Network Architecture"** chart explained at the 57min 30sec mark.)

**Note specifically the:**

- **Hidden Wireless Internet Connection**
- **"Kingpin" (mid-center-right) box, and the**
- **Foreign Intrusion Back Door (bottom-far-right) box.**

And ...

### Summary:

(See this **"So This is How They Stole the 2020 Election"** chart explained at the 1 hour 10 minute and 30 second mark.)

**Note specifically the:**

**So This is How They Stole the 2020 Election**

They know the outcome before hand. In the Early Voting, the Trump votes are likely the first to be discarded. Run the Tracking Simulation (i.e., a 'Cruise Control' type algorithm) to its predetermined setpoints deleting as many Trump votes as you can in Real-Time while also adding necessary ghost votes for Biden from an almost infinite supply of fake 'registered' Independents. After the Election, assign Phantom names and addresses to the ghost votes. If any of the ghost votes are actually real people they'll never be contacted by either Party because they are Independents. Now delete all the unnecessary Phantom voters from the registration roles before any Auditor notices. Then hide all the Phantom voters included in the rigged counts of each State by down-streaming back to the Tabulators **LONG AFTER THE POLLS ARE CLOSED**. Be careful to spread them thinly by selecting their addresses randomly over a thousand Precincts. If anyone notices in a particular Precinct call it a "Glitch" or a "Human error". Follow that statement with "Well it wasn't enough to change the outcome of the Election".
